

**FAYETTE COUNTY MULTI-JURISDICTIONAL
ALL HAZARDS MITIGATION PLAN
PUBLIC FORUM TELECONFERENCE**

MAY 21, 2020

6:00 P.M.

Each year natural hazards (i.e., severe thunderstorms, tornadoes, severe winter storms, flooding, etc.) cause damage to property and threaten the lives and health of Fayette County residents. Since 2002, Fayette County has been included in four federally-declared disasters and experienced at least \$10.8 million in verified property and \$42,500 in crop damage within the County.

Since 2010, there have been 90 heavy rain events, 34 thunderstorms with damaging winds, 22 excessive heat events, 16 severe winter storms, 13 flash flood events, 10 severe storms with hail one inch in diameter or greater, nine riverine flood events, six tornadoes, two droughts, two extreme cold events and one lightning strike verified in the County. While natural hazards cannot be avoided, their impacts can be reduced through effective hazard mitigation planning.

What is hazard mitigation planning?

Hazard mitigation planning is the process of determining how to reduce or eliminate property damage and loss of life from natural and man-made hazards. This process helps the County and participating municipalities reduce their risk by identifying vulnerabilities and developing mitigation actions to lessen and sometimes even eliminate the effects of a hazard. The results of this process are documented in an all hazards mitigation plan.

Why prepare an all hazards mitigation plan?

By preparing and adopting an all hazards mitigation plan, participating jurisdictions become eligible to apply for and receive federal hazard mitigation funds to implement mitigation actions identified in the Plan. These funds, made available through the Disaster Mitigation Act of 2000, can help provide local government entities with the opportunity to complete mitigation projects that would not otherwise be financially possible.

Who participated in the development of the Fayette County Multi-Jurisdiction All Hazards Mitigation Plan?

Recognizing the benefits that could be gained from preparing an all hazards mitigation plan, Fayette County invited all the local government entities within the County to participate. The following jurisdictions chose to participate in the Plan development:

- | | | |
|--------------------------|-------------------------------------|---------------------------------------|
| ❖ Brownstown, Village of | ❖ St. Elmo, City of | ❖ St. Peter Volunteer Fire Department |
| ❖ Brownstown CUSD #201 | ❖ St. Elmo Fire Protection District | ❖ Vandalia, City of |
| ❖ Ramsey, Village of | ❖ St. Peter, Village of | ❖ Vandalia Township |
| ❖ Sharon Township | | |

How was the Plan developed?

The Fayette County Multi-Jurisdictional All Hazards Mitigation Plan was developed through the Fayette County Multi-Jurisdictional All Hazards Mitigation Planning Committee. The Planning Committee included representatives from each participating jurisdiction, as well as agriculture, education, emergency services (search and rescue & fire protection), healthcare, and insurance. The Planning Committee met three times between November 2019 and May 2020.

Which natural and man-made hazards are included in the Plan?

After reviewing the risk assessment, the Planning Committee chose to include the following natural and man-made hazards in the Plan:

Natural Hazards:

- ❖ severe storms (thunderstorms, hail, lightning & heavy rain)
- ❖ severe winter storms (snow, ice & extreme cold)
- ❖ excessive heat
- ❖ floods (general & flash)
- ❖ tornadoes
- ❖ drought
- ❖ earthquakes

- ❖ levee failures
- ❖ dam failures

Man-Made Hazards:

- ❖ hazardous substances (generation, transportation and storage/handling)
- ❖ waste disposal
- ❖ hazardous material incidents
- ❖ waste remediation
- ❖ terrorism

What is included in the Plan?

The Plan is divided into sections that cover the planning process; the risk assessment; the mitigation strategy, including lists of mitigation actions identified for each participating jurisdiction; and plan maintenance and adoption. Much of the Plan is devoted to the risk assessment and mitigation strategy.

This risk assessment identifies the natural and man-made hazards that pose a threat to the County and includes a profile of each natural hazard which describes the location and severity of past occurrences, reported damages to public health and property, and the likelihood of future occurrences. It also provides a vulnerability assessment that estimates the potential impacts each natural and man-made hazard would have on the health and safety of the residents of Fayette County as well as the buildings, critical facilities and infrastructure in the County.

The key component of the mitigation strategy is a list of the projects and activities developed by each participating jurisdiction to reduce the potential loss of life and property damage that results from the natural and man-made hazards identified in the risk assessment. These projects and activities are intended to be implemented *before* a hazard event occurs.

What happens next?

Any comments received during the public comment period will be incorporated into the draft Plan before it is submitted to the Illinois Emergency Management Agency (IEMA) and the Federal Emergency Management Agency (FEMA) for review. Once IEMA and FEMA have reviewed and approved the Plan, it will be presented to the County and each participating jurisdiction for formal adoption. After adopting the Plan, each participating jurisdiction can apply for federal mitigation funds and begin implementation of the mitigation actions identified in the Plan.
